

RoxPos is a Point of Sale Software that was created in 2016 to easily manage all of your business processes, with the latest technological infrastructure.

The biggest advantage of RoxPos is that the staff can use the system in the simplest way. Food & Beverage sector is the fastest service and result cycle of the sector.

With the ROX you can easily order, track your orders, collect your payment as quickly as possible and track your stocks. You can take the end of the day in seconds, you can check all performance reports (table, waiter, etc.) from the screen or from your mobile phone.

ROX allows you to offer the highest quality and fastest service to more customers with just the required number of employees. When you plan how to expand your business, Rox does the rest and maximizes productivity.

ROX works with all operating systems on the market.

ROX is fully compatible with franchise and branch chain infrastructure.

You can use ROXPos as a cloud-based application and pay as you use it at very reasonable prices.

ROX earns control of business activities from start to finish; sales, cash and stock leaks with the ability to largely prevent the operating profit of 30%, up to a 25% increase in performance by making an investment in 3-6 months.

For more information and inquiries please contact us by phone, mail or Live Chat 24/7.

Easy, Fast and Smart: Rox
